

Perseus™ SC

RESIDUAL GRASS & BROADLEAF WEED CONTROL IN WHEAT

Why Choose PERSEUS™ SC?

PERSEUS SC delivers long-lasting residual control of key grass and broadleaf weeds that compete with your wheat for moisture, nutrients, and yield potential. Its low-use-rate liquid formulation provides application flexibility and an effective resistance management tool for modern wheat production systems.

Active Ingredient:
Pyroxasulfone
41.46% (500 g/L SC)

HRAC Group:
15

Formulation:
Suspension
Concentrate

Signal Word:
Caution

REI:
12 Hours

Key Benefits

- Extended residual weed control.
- Controls many annual grasses and small seeded broadleaf weeds.
- Ultra-low use rates.
- Tank-mix compatible liquid formulation.
- Effective resistance management tool (HRAC 15).
- Flexible application timing options.
- Supports cleaner fields and improved yield potential through early-season weed suppression.

Key Wheat Weeds Controlled

Annual Grasses

- Annual bluegrass
- Foxtail species (giant, green, yellow)
- Crabgrass species
- Woolly cupgrass
- Goosegrass
- Wild oat
- Shattercane
- Ryegrass species

Broadleaf Weeds

- Common lambsquater
- Pigweed speices
- Palmer amaranth
- Waterhemp
- Kochia
- Horseweed (marestail)
- Common ragweed
- Velvetleaf
- Hairy fleabane

Wheat Use Highlights

PERSEUS SC provides residual control of susceptible weeds in wheat and can be incorporated into comprehensive weed management programs. The pyroxasulfone mode of action inhibits very-long-chain fatty acid synthesis in emerging weed seedlings, preventing establishment and early competition.

Application Advantages

- Long residual activity for season-long weed suppression
- Excellent foundation treatment for resistance management programs
- Compatible with many burndown and postemergence herbicide programs
- Low-use-rate liquid formulation simplifies handling and mixing

Product Information

Feature	Pyroxasulfone 41.46%
Formulation	Suspension Concentrate
HRAC Group	15
REI	12 Hours
Signal Word	Caution
Use Rate	Refer to approved wheat label
Packaging	2 x 2.5-gallon container

Always read and follow label directions.

Use PERSEUS SC as part of an intergrated weed management program that includes multiple effective sites of action and cultural practices to help delay herbicide resistance development.

PERSEUS SC may not be registered for sale or use in all jurisdictions. Please check with your local extension service to ensure registration status.
